

My Research Plan

1. **Title of your research:**
2. **Research question:**
3. **Explain the purpose of the study** (specifically, what is your focus of research, why, and what do you hope to accomplish with it).
4. **Conceptual/theoretical framework** (what theories are you using as a guide for your research - remember, I sent you a video about this...I'd encourage you to watch it)
5. **What will you cover in your literature review** (just in general - what information would you add)
6. **Summary of the study's methodology.**
 - a. What type of research are you going to do:
 - b. What type of data do you need in order to do this research:
 - c. How will you collect this data? (survey, interview, archival data, etc.)
 - d. How will you recruit your participants?
 - i. Sampling size and method
 - ii. Where will you go to recruit your participants and by what means (advertisement, direct contact, referral, institutional request)
 - iii. What will you offer in terms of incentive/benefit for your participants?
 - e. Explain the overall steps of the procedure that you will use (think of this as step-by-step what you will do. Ensure you mention how you will keep the participants safe and that their privacy is maintained)
7. **Participant Demographics**
 - a. Anticipated sample size (how many participants would you like to have for your study? Please explain why this is your goal and who these participants will generally consist of.
 - b. Age group:
 - c. Inclusion/Exclusion criteria:
