

### **Westcliff University Similarity Policy for Dissertations**

Dissertations accepted by Westcliff University must be original work, as evidenced by the Turnitin Similarity Report generated by the final dissertation. This report will exclude quotes, references, and small matches (under five (5) words). Regardless of overall similarity rating, the Report must be thoroughly reviewed by the student and the Dissertation Chair before the dissertation is approved. Generally, 15% will be considered the maximum acceptable level on the Similarity Report, but dissertations will not be approved if continuous blocks of text are flagged by the report without proper citation.
